## Strategy

### IT Software Services

We are committed to deliver the best-suited business solution and efficiently accomplish the project. To provide our clients with cost-effective and standard services using advanced technology, we follow **Onsite** and **Offshore** delivery models depending upon client's requirement and feasibility analysis by our experts' team. It helps us deliver the project timely and concurrently clients to succeed in their set goal.

At present, we have aimed Thailand and Singapore market for providing with our cutting-edge business solution. Since India is considered the top IT talents, we have setup here well-equipped development center with high-end infrastructure where we have highly skilled workforce to provide clients with cost-effective business solution.

We keep our client well informed about ongoing development processes and other important information by providing regular status report. Keeping transparency in processes makes us apart and pushes for further leap.

### Construction

Quality of workmanship that we provide to our esteemed clients is of utmost importance to us. The “No Compromise” policy, concerning safety and quality has made us successful in the competitive world.

In order to maintain the safety and quality on site, our operatives are given formal trainings in these aspects. Our training centers in India, Bangladesh, Thailand, Myanmar and Singapore help us to achieve that, wherein all our technicians are subjected to numerous safety inductions in their native language in order to imbibe in them the responsibility of working safely on site. We are proud to say that till date we have worked with a “Zero” LTI.

Quality assurance is another key area of concern to us. Our training centers also act as testing centers for all the new recruits, wherein their skills of scaffolding, insulation, blasting & painting and execution are tested and assessment of their on-the-job experience is gauged. Our workforces are carefully screened and we only recruit workers with proven skills so that they can give our clients the best services and the quality of workmanships expected.

To meet the requirements in this competitive industry, we make constant efforts to send our workforce for training to upgrade their skills to ensure that they can meet up with our client’s requirements.

Besides safety orientation courses, our operatives are sent for skills evaluation certification courses in diverse areas such as Metal Scaffold Erection, Plant equipment fitting, Rigging & Material Handling & Welding etc. We also send them for refresher courses to update them on changes in the respective trades.

Our scaffolding and insulation personnel attend all relevant courses Accredited by the Ministry of Manpower:-

- Safety Co-coordinator Training Course
- Safety Instruction Course (Manhole) for Supervisors
- Oil / Petrochemical industry Safety Course for Supervisors
- Lifting Supervisors Safety Course
- Supervision of Metal Scaffold Erection Course

## **Logistic**

We have invested in and are well-equipped with an assorted range of tools and machinery on stand-by to enable us to tackle any job immediately and to meet any contingency. We are conscious that no project should be held up because of lack of manpower or necessary materials and tools. We kept an array of safety harness and Personal Protective Equipments (PPE) and our workmen are required to put them on at all time when undertaking any project.

We are also strong in logistics support, both in transportation and accommodation for our workforce. Our current lodgings can house up to 700 workmen and further can be arranged up to any number as & when required.

## **Our Team**
